I don't think so. The reason I asked the question is because you mentioned "one day" in your message.

Looks like a max of 2 days (1 for the installation of the clump weight and 1 for installation of the spar buoy). Does this affect whether or not a permit will be required?

Hi Carla:

Do you know for sure that the 4 point moored crane barge(that will be used to place the Clump Weigh on the sea floor) will be attached to the seabed only for one day ?
